

ALIS TIYANING TIYAS

UI/UX DESIGN

/ ALL ABOUT ME

I'm a self-taught UI / UX designer with a strong eye for innovative design and a keen understanding of engineering geared towards an optimal user experience.

I have been doing Digital Product Design for the last few years with a great interest in learning and exploring new possibilities. I uncovered the problem and solved it. I have successfully created several products including mobile app and user interface website. I always want to learn more from the experiences around me and by creating experiences for others. I believe the UI is a mixture of all things. Designing great experiences is a real team effort. I work closely with team members and users to enhance the appearance of the product without leaving the goals and processes in sync. I am always ready and excited to solve the problems I face.

/ CONTACT DETAILS

Jl. Bangao Wonocatur No.578 RT.13/RW.26, Karang Bendo, Banguntapan, Kec. Banguntapan Bantul, Daerah Istimewa Yogyakarta (55198).
